

Project Management and Accounting - Solomon

Enhance control of project progress and profitability by increasing awareness of changes in key indicators or documents awaiting action. Automated alerts keep you informed of pending deadlines, required approvals, escalating costs, and eroding margins, making it easy to intervene so projects and profits stay on track.

BENEFITS

Speed up review processes

Receive notice of budgets, invoices, timecards, or expense reports awaiting review so they can be processed immediately.

Avoid financial surprises

Set alerts to warn you if project margins, expenses, accounts receivable, or other important indicators cross limits you define so that timely corrective actions can be taken.

Track business performance

Keep tabs on profitability or other important measures without repeatedly poring over project details by receiving defined messages linked to financial results.

Ensure documentation compliance

Efficiently maintain important documents related to insurance, liens, permits, or specifications, automatically sending reminders to responsible managers when updates or other actions are required.

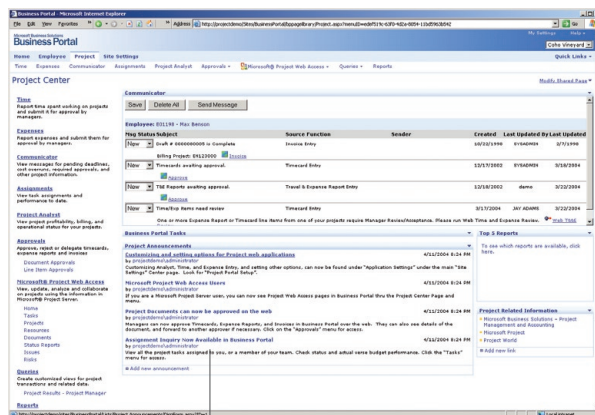

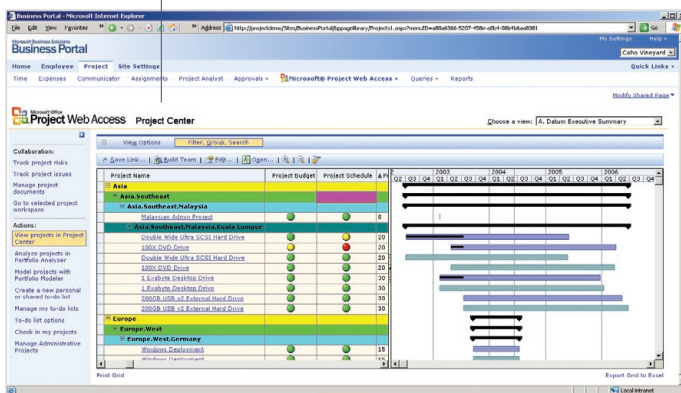

Manage projects proactively

Rely on automated exception notices to alert you to potential project problem areas while you still have time to take action.

COMMUNICATOR

Receive messages

alerting you that a timecard is awaiting your review/ approval or requiring your immediate attention.

Send a message to alert a designated individual that their attention and/or action is required.

- SOLOMON STANDARD

COMMUNICATOR | FEATURES AND FUNCTIONALITY

Improved Project Results	Respond quickly to automated, user-defined exception notices that point out problem areas while you can still make necessary adjustments.
Streamlined Workflow	Learn about pending timecards, budgets, and other documents the moment they are ready for review to ensure quick handling and eliminate delays.
Performance Management	Save time tracking results by requesting notice if key project financials or schedule milestones stray from targets you define.
Flexible Messaging	Create custom alerts to monitor any important project parameter, sending the alerts to any user or project employee working in Microsoft® Business Solutions-Solomon.
Ad Hoc Messages	Create new project messages as you need them, embedding hot links to any Microsoft Solomon module or other URL, and send the messages immediately using the Communicator Send feature.
Distribution Options	Read alerts and messages from within Microsoft Solomon project accounting modules by using the View Messages screen; receive them via e-mail; or both.
Remote Access	Keep abreast of project workflow and alerts from the field using Internet and e-mail messaging options.
Full Integration	Handle pressing project tasks with one-click efficiency thanks to shared data between Communicator and other Microsoft Solomon modules.
