

Streamline Security and Efficiency with the Endpoint & Device Management Assessment

Discover how one financial services organization partnered with JourneyTEAM for a device management assessment to uncover risks, enhance security protections, and optimize processes.

Assessment Execution

The assessment includes the following steps that led this financial company to sustainable growth.

01 In-Depth Analysis:

- Conducted a comprehensive evaluation of device management infrastructure.
- Identified potential vulnerabilities and compliance gaps in policies, configurations, and security measures.

02 Risk Assessment:

- Performed a thorough evaluation of security threats and vulnerabilities specific to the financial industry.
- Prioritized identification of risks that could compromise sensitive financial data and client information.

03 Regulatory Compliance Review:

- Evaluated device management practices against industry-specific regulations like GDPR, PCI DSS, and SOX.
- Ensured alignment with crucial compliance standards for the financial sector.

04 User Experience Evaluation:

- Assessed the user experience for employees, focusing on authentication processes and application accessibility.
- Aimed to enhance user productivity while maintaining strict security controls.

05 Comprehensive Device Inventory:

- Conducted a thorough check of device health and security status.
- Identified unsupported or non-compliant devices for prompt corrective actions.

A long-term device management strategy for scalable growth

This Assessment brought this financial company valuable Insights for integrating Intune with other third-party solutions for a more unified device management ecosystem. This in turn led to the following business values:

1. **Robust Security Measures:** JourneyTEAM's assessment identified potential security threats specific to the financial sector, such as data breaches and unauthorized access. This financial services company then implemented robust security measures to safeguard financial data and protect against cyber threats.
2. **GDPR and Compliance Adherence:** The assessment ensured this company complied with GDPR and other relevant regulations. By aligning their device management practices with these standards, the company mitigated legal and financial risks.
3. **Enhanced User Experience:** JourneyTEAM addressed user experience challenges, ensuring a seamless and efficient experience for employees accessing critical financial applications. This improvement led to increased employee productivity and satisfaction.
